PROFESSIONAL SUMMARY

I am an adaptable software developer who transitioned from Industrial Chemistry to tech during the COVID-19 lockdown through self-directed learning. I am skilled in frontend and backend technologies including React.js, React Native, Next.js, Node.js, Express.js, and proficient in databases such as MySQL, MongoDB, and MariaDB. I also have experience in deploying applications on Vercel, Render, and VPS hosting servers (setup, configuration, and management). Strong abilities in problem-solving, collaboration, and communication. Currently expanding expertise into blockchain and Web3 development.

SKILLS

- **Languages:** HTML/CSS, JavaScript (ES6+), TypeScript, PHP, SQL
- **Frameworks & Libraries:** React.js, React Native, Next.js, jQuery, Express.js, Redux, Redux Toolkit, Tailwind CSS, Bootstrap, Styled Components, axios
- **Runtime & Platforms:** Node.js
- **Databases:** MySQL, MongoDB, MariaDB
- **Dev Tools & Package Managers:** Git, GitHub, npm, npx, Yarn, VS Code, nodemon
- **DevOps & Deployment:** Vercel, Render
- **Soft Skills:** Problem-Solving, Team Collaboration, Communication, Leadership

EXPERIENCE

FullStack Developer (Freelance) | Inn Logistics | 2024 | [LINK](#)

(React.js, Bootstrap, Node.js, Express.js, MySQL, GitHub, VPS hosting)

- Migrated the existing PHP website to a React.js frontend and Node.js/Express backend, modernizing the stack for performance and scalability.
- Built a secure authentication system with JWT + bcrypt, enabling signup/login for users and admins.
- Implemented multi-level role-based access control (RBAC):
 - Owners, Managers, and Workers each had defined permissions.
 - Only certain roles could suspend/block users, manage accounts, or access sensitive features.
- Rewrote legacy PHP logic into modular REST APIs connected to MySQL.
- Deployed on a VPS using Nginx + PM2 for production reliability.

Frontend Developer | Qol Labs | March 2024 - Present

(React Native, Google AdMob, Next.js, Tailwindcss, GitHub, Vercel)

- Built a responsive ad-based platform using React Native.
- Integrated JWT authentication for secure user sign-up, sign-in, and password reset processes.
- Integrated google-mobile-ads for reward based incentive.
- Optimized state management with Redux Toolkit, streamlining complex data flows.
- Built the company's website using Next.js TypeScript, with contact page form to mail submission directly to google from to reduce load on the backend services. | [LINK](#)

Frontend Developer | \$Nomos | Jan 2023 - March 2024

(React.js, CSS Grid / Flexbox)

- Developed a decentralized voting MiniDApp on the Minimia blockchain, translating Figma designs into mobile React interfaces.
- Implemented CSS Flexbox/Grid and media queries, ensuring seamless UX across devices.

PROJECTS

- [Smart Winners](#) (CSS grid, jQuery)
- [Tesla Clone](#) (React.js, Styled Components)
- [CommerceHub](#) (React.js, Flexbox, Grid, TailwindCSS)
- [Blog Website](#) (React.js, Tailwindcss)
- [Quiz](#)
- [Dark Mode](#) (Theme switcher, jQuery and CSS)

EDUCATION

University of Ilorin, Kwara, Nigeria - B.Sc Industrial Chemistry (2017 - 2023)

CERTIFICATIONS

Web Development Fundamentals, Sololearn - **April 2022**

jQuery - **September 2022**
